

Your Music...

- JC Entertainment creates a customized play list for every event! We welcome suggested song lists in advance and will play as many as possible throughout the evening!
- You may also request up to ten “special” songs for your event (dedications, first dance, etc.). If we don’t have them, we will purchase them at our expense or convert them for our digital system from your CD as long as the list or CD is received at least two weeks before the event! We only ask that songs we purchase be available on iTunes in single form (not requiring the purchase of an album).
- We provide cocktail and dinner music from our music library in the style of your choice (soft jazz/pop, classical, etc.).
- If you are unsure of the type of music you would like for special event songs, etc., we are happy to assist! You will also find song suggestions on our web page!
- The DJ will accommodate and encourage requests from guests within the guidelines you’ve given us! We will switch tempos and styles throughout the evening, giving everyone, from young to old, a chance to dance to their favorite music!
- We don’t take breaks--music will be provided for you and your guests throughout the evening!
- We will arrive approximately three hours before your event. This allows us to do a sound and light check and meet with coordinators of the event and assures that music is playing when the very first guest arrives. (We never set up after an event has begun.) We provide our own tables and professional black table skirting.

We look forward to being part of your special day!
